

May 19, 2009

Cessna Aircraft Company, the world's largest producer of general aviation aircraft, has had a long relationship with Wichita-based PWI, Inc., using its products on a variety of Cessna aircraft including some of its single-engine pistons and on its Citations, including the Citation X, the world's fastest civil aircraft.

Cessna uses 11 different products from PWI including fluorescent lights, lighting assemblies and other electrical products. PWI is well regarded within Cessna for its adherence to schedule, posting a 100 percent on-time-delivery performance over the past year.
